

A first in Türkiye from Deniz Asset Management: Pound Free Fund

Deniz Asset Management launched the first free Fund of Türkiye in Pound currency, marking an important innovation for the investment world.

Deniz Asset Management General Manager Haldun Alperat shared his views on the subject: "As Deniz Asset Management, we have 400 billion TL of mutual fund size and over 20 years of experience in our sector. Today, we are working to support the asset selections for our investors with 104 funds. Increasing the fund diversity, we both care about meeting the needs of our customers and introducing novelty for your sector. We are observing that there has been a dramatic increase in demand towards Pound. The investors also tend to capitalize on their savings with currency diversity. As Deniz Asset Management, for those wishing to capitalize on their savings in pound, we are extremely happy to offer our product which marks a first and is an alternative to the world of investment. In the next period, we will continue to make an investment in alternative themes."
