Today in the markets

Today: It's election time in the US. The potential for extremely high, two-way volatility risk and the time to rethink positions.

Let's briefly summarise the markets: Ahead of the election, general risk appetite was extremely low. The major US indices posted limited losses in the trading session on 4 November, which was dominated by a wait-and-see attitude.

Contrary to our expectations, trading volumes were not bad. Volumes, which were close to the average of the last 1 month, were 1-2% higher. The US dollar, unsurprisingly, depreciated in line with the news flow it inherited from the weekend, with the DXY ending the day at -0.38%. Bond yields, on the other hand, fell in both short and long maturities in line with the USD. Let's review our list: We go into the US elections with bond yields at 4.16% for 2-year bonds and 4.28% for 10-year bonds. The DXY is close to the 104.00 level. On the commodities front, we're following gold at \$2736 an ounce and Brent crude at \$75 an ounce, but we'd add that there's a trend in oil after OPEC+ postponed the December production increase.

The picture of tight, uncomfortable, unexciting and low-volume selling pressure in Turkish equities has not changed. Yesterday, the BIST 100 index fell 2.49% on volume of 68 billion liras and 3.2 billion shares. The loss in XBANK, which we follow as a driver of the return from the bottom, was 4.83%.

Monthly CPI inflation was 2.88% in October. Annual inflation was 48.58%, down by around 1 percentage point. The PPI rose by 1.29% mom to 32.24% yoy. The increase in seasonal items in the main expenditure groups had an impact on the October figures. An example of this is the 14.32% rise in clothing and footwear. On the other hand, food and non-alcoholic beverages (4.33%), communication (3.52%) and health (2.88%) should not be ignored. While the stable lira, supported by global commodity prices, has eased pressure on the PPI headings, strong domestic demand and the lingering effects of the August exchange rate appreciation are still being felt. On the other hand, there has been a limited improvement in the services sector, which has long been our focus. After rising by 4.90% in September, the latest data show the services component rising by 1.95%. The 3-month average fell slightly from 4.63% to 3.82%. The fact that the transport services component was monitored at -2.04% had an impact on this trend.

Equities

THYAO: Financial statements / slightly positive

Türk Hava Yolları booked USD6.630 mn revenues (Consensus: USD6.633 mn / Deniz Invest: USD6.644 mn), USD2.167 mn EBITDA (Consensus: USD2.075 mn / Deniz Invest: USD2.060 mn) and USD1.543 mn net income (Consensus: USD1.410 mn net profit / Deniz Invest: USD1.349 mn net profit) in 3Q24.

Positive balance sheet details

Strong growth in cargo revenue, EBITDA and net income slightly above expectations

Negative balance sheet details

Weakness on passenger side, increase in debt

Our brief assessment of the balance sheet

The cargo side was the main highlight of 3Q24 financial results, we have been expecting the ongoing weakness in passenger unit revenues and the contraction in margins under the 'normalisation' heading for a long time. In this context, we evaluate the financial results as slightly positive

Overview: After the third quarter financials, we maintained our 12-month target price for THYAO as TRY448,00 and our BUY recommendation. The company will hold a teleconference on 5 Nov at 17:00 at local time. The stock overperformed the index by 1% YTD. According to the 12-month trailing data, the stock trades with 2.0x P/E and 4.8x EV/EBITDA.

PETKM: Ethylene-naphtha spread decreased last week/ negative

According to the data shared by Petkim, ethylene-naphtha spread was down by USD37.0 (20.2%) w/w to USD146.0 as of Kas 01, 2024. While ethylene prices down by 4.7% naphtha prices down by 0.2% Note that the spread had been down by USD98.0 last week. We regard decrease as negative for Petkim.

Although the ethylene-naphtha spread is a general profitability metric for the petrochemical industry, final product prices should be followed to make a better interpretation of the profitability outlook. The Platts index can also be followed in this respect, as it is an index of the prices of certain petrochemical products. However, it should be noted that the Platts index does not exactly match the product range produced by Petkim.

SAHOL: Our 3Q24 estimates

Especially for this period, as in previous quarters, we would like to remind you once again that since the inflation accounting has come into force in the majority of companies listed on BIST, we cannot publish earning preview for the companies within our coverage in the order and scope we are used to.

Firstly, we underline that our estimates include the effects of inflation accounting. About the outlook for 3Q24 period; in addition to the weakening bank segment, we think that the Company may record a net loss, assuming that monetary gain and loss item will continue to remain in a suppressive position in terms of bottom line, similar to the previous periods.

We expect the Company to record net loss of TRY665 million. The Company will announce 3Q24 financials on 6 November. Recall that Sabancı Holding announced net income of TRY17,274 million in 3Q23, excluding the effects of TAS 29.

While our 12-month target price for Sabanci Holding is TRY138.00, our recommendation is BUY. The stock outperformed the index by 19% YTD. According to last 12-months data, the stock is trading at 0.7x P/B multiple.

CCOLA: Review of financial results / negative

Coca Cola İçecek booked TRY36,711 mn revenues (Consensus: TRY39,674 mn / Deniz Invest: TRY43,317 mn), TRY7,364 mn EBITDA (Consensus: TRY7,619 mn / Deniz Invest: TRY8,621 mn) and TRY5,173 mn net income (Consensus: TRY5,055 mn / Deniz Invest: TRY4,864 mn) in 3Q24. Due to inflation accounting, there was a positive impact of TRY2,181 million under the monetary gain/loss item in 3Q24 financials.

Positive balance sheet details

Maintaining EBITDA margin at around 20%

Negative balance sheet details

Sharp contraction in sales volume, downward revision of expectations for the second time, increasing net debt.

Our brief assessment of the balance sheet

We evaluate 3Q24 financials negatively due to the decline in sales revenues, although EBITDA margin was maintained at 20%. In addition, we believe that the second downward revision of expectations will put pressure on the pricing of the stock. On the other hand, it should be noted that the stock has probably been suppressed for some time with expectations for its financial results. The main reasons for the deviation in our forecast are the contraction in sales volumes more than our expectations and the negative impact of inflation accounting on foreign sales.

Overview: Within the framework of the downside expectations updated by the company and the changes we have made in our macro set, we revise our 12-month target price for Coca Cola İçecek from 99.80 TL to 82.40 TL and maintain our BUY recommendation. The stock underperformed the index by 12% YTD. According to 12-month trailing data, the stock is trades with of 6.7x F/E and 6.9x EV/EBITDA.

SIGNIFICANT

As Deniz Investment Strategy and Research Department, we do not make any investment consultancy and/or buy-sell proposals in this study. Investors should make decisions on their own portfolio with their own free will. The aim of this study is to reflect the values they get on a daily basis through the scoring system established over the changes of the selected indicators (price level, trading volume, RSI and MACD).

How the scoring system works ?

Shares that meet each of the following conditions are given 25 full points. Evaluation was made out of 100 full points. The shares in the BIST 100 index are ranked from largest to smallest according to their total scores. 1) The trading volume on the basis of shares should be above the average trading volume of the last 3 days. 2) The last scores price should be above the 3-day noving are verieved used to the average value of the last 5 days. 3) The last volues for the RSI indicator should be above the 3-day noving area were average value of the average value of the last 5 days. 4) The last volues for the RSI indicator should be above the verage value of the last 5 days. 4) The last volue for the RSI indicator should be above the verage value of the last 5 days.

Deniz Invest Model Portfolio

Deniz Invest Model Portfolio is a medium-long-term stock recommendation list prepared by the Deniz Invest Strategy and Research Department according to fundamental analysis criteria. The positions taken are long only. There is no numerical/percentage return target. There is no limit on the number of companies. There is no obligation to make changes in any frequency/calendar. Strategy and Research Department analysts have the right not to change the portfolio within the calendar year if market conditions do not allow it. <u>Sten is no return potential for the companies in the portfolio in terms of fundamental analysis (as a valuation), they can continue to remain in the list with their past and future trust in the companies within the list with their HOLD and/or Under Review (UR) suggestions.</u>
